Ibrahim Morad

Django Backend Developer

ibrahimmorad31@gmail.com • +201152869950 • Nasr City, Cairo, Egypt

https://www.linkedin.com/in/ibrahim-morad-django/

PROFESSIONAL SUMMARY

Detail-oriented Django backend developer with a multidisciplinary background in physics, scientific research, and software engineering. Committed to delivering secure, scalable, and well-structured systems following best practices with a strong emphasis on performance optimization, clean architecture, and maintainability. Experienced in RESTful API design, authentication systems, and third-party integrations. Known for thoroughness, critical thinking, and effective collaboration across cross-functional teams.

EXPERIENCE

Freelance Django Backend Developer — 2025 – Present

Self-Employed | Remote

- Built Ammar Academy, a production-ready online learning platform with multi-role user system (admin, teacher, paid/unpaid student, visitor), social and email authentication, courses browsing, progress tracking, auto-generated quizzes, parent reports, analytics dashboard, online payments, and enrollment management.
- Integrated Bunny.net for secure video streaming and Firebase Cloud Messaging for push notifications in Ammar Academy.
- Deployed Ammar Academy using Docker Compose (Django, PostgreSQL, Redis, Traefik, and Nginx containers); covered codebase with pytest.
- Developed the backend for a private tutoring mobile app with materials management and auto-graded quizzes.
- Designed and deployed QuizCraft, an exam generation platform that produces unique randomized exams per student from a question bank.

Research Assistant – Large-Scale Ozone Generator — *2022 – 2024*

Academic Research Project | Egypt

- Contributed to developing a large-scale ozone generator for industrial water treatment targeting textile and dye factories.
- Involved in hardware assembly (specialized steel and dielectric glass components), high-frequency low-current circuit design, and water sample testing across varying dye concentrations.

Physics Solutions Expert (Freelance) — *2018 – 2021*

Slader / Quizlet | Remote

- Authored 3,000+ detailed solutions to university-level physics problems (Years 1–2 curriculum) from widely used physics textbooks.
- Wrote all solutions in LaTeX with complete derivations, ensuring full conceptual clarity without requiring any external references.

EDUCATION

Software Engineering Program – Backend Specialization — *2023 – 2024*

ALX Africa

- Intensive 12-month program spanning C, Python, JavaScript/TypeScript, SQL/NoSQL, algorithms & data structures, authentication, DevOps (Docker, Nginx, HAProxy, SSL/DNS), and system engineering.
- Graduated with Foundation score 134% and Backend Specialization score 135%.
- Certificate: savanna.alxafrica.com/certificates/m7jfx5spgm

Pre-Master Studies – Theoretical Physics *2017*
Faculty of Science

- Completed pre-master coursework and examinations in theoretical physics.

B.Sc. in Physics *2012-2016*
Faculty of Science

SKILLS

Backend	Python, Django, Django REST Framework, Simple JWT, dj-rest-auth, django-allauth, Celery
Databases	PostgreSQL, MySQL, SQLite, MongoDB, Redis
DevOps & Tools	Docker, Nginx, Traefik, Git, GitHub, Bash, Vim
Frontend	HTML, CSS, HTMX, Tailwind CSS, JavaScript (ES6+), TypeScript, React (basic), Next.js (basic)
Other Languages	C, C++, Node.js, Express.js
Testing	pytest, unittest
Integrations	Firebase Cloud Messaging, Bunny.net (video streaming)
Other	LaTeX, MS Access, MS Word, MS PowerPoint
Soft skills	Problem-solving, attention to details, analytical skills, commitment and dedication, ability to learn new technologies, and teamwork.

PROJECTS

Ammar Academy *2024*
Production-ready online learning platform with multi-role auth (admin/teacher/student/visitor), social login, courses browsing, progress tracking, auto-generated quizzes, parent reports, analytics, online payments, Firebase push notifications, and Bunny.net video streaming. Fully Dockerized.
Tech: Django · DRF · PostgreSQL · Django-allauth · Redis · Docker · Bunny.net · Firebase

QuizCraft *2024 – Present*
Exam generation platform that creates unique randomized exams per student from a question bank. Currently being enhanced with HTMX, Tailwind CSS, class-based views, and Celery. Live and deployed.
Tech: Django · Django Templates · HTMX · Tailwind CSS
Link: ibrahimmorad.pythonanywhere.com

Maryema *2024*
Personal learning project — a multi-divisional e-commerce platform for clothes and accessories. Implemented user auth, product catalog with filtering, cart management, order processing, feedback and rating system, analytics dashboard, Redis caching, and Swagger API documentation.
Tech: Django · DRF · Simple JWT · PostgreSQL · Redis · React · Next.js
Link: github.com/IbrahimMurad/Maryema

Todo List *2024*
Live full-stack task management app with Google OAuth, drag-and-drop reordering, dark mode, filters, and local storage for anonymous users. Deployed on Vercel.
Tech: Next.js · TypeScript · Tailwind CSS · PostgreSQL · Auth.js
Link: todo-list-nine-psi-73.vercel.app/

CERTIFICATIONS

Software Engineering – Backend Specialization | ALX Africa, 2024
savanna.alxafrica.com/certificates/m7jfx5spgm

LANGUAGES

Arabic — Native **English** — Professional

VOLUNTEER WORK

Documentation Contributor & Bug Reviewer *2025 – Present*

ITQAN Community (Open Source) | Remote

- Contributed to RATQ, a comprehensive roadmap guide for Quranic app developers.
- Researched and documented required tools, technologies, and resources for the roadmap.
- Reviewed community-contributed code and resolved reported bugs.
- GitHub: github.com/Itqan-community/RATQ
